* Distance Education is defined in CB Rules 5.152 as: Instruction in which the majority of the instruction occurs when the student and instructor are not in the same physical setting. Instruction may be synchronous or asynchronous to any single or multiple locations(s): (A) Other than the “main campus” of a senior institution (or “on campus”), where the primary office of the chief executive officer of the campus is located; (B) Outside the boundaries of the taxing authority of a community/junior college district; or (C) Via instructional telecommunications to any other distance location, including electronic delivery of all types.

Off-Campus Education is defined as: Instruction in which one-half or more of the instruction is delivered with the instructor and student in the same physical location and which meets one of the following criteria: for senior institutions, Lamar state colleges, or public technical colleges, off-campus locations are locations away from the main campus; for public community/junior colleges, off-campus locations are locations outside the taxing district.
